

Government Transformation & Digitization

A platform of applications designed to enable governments to efficiently deliver programs and services for its citizens. From citizen mobile applications, health and social services, to revenue generating transactions, our platform integrates all these into one central database. Modular by design, deploy only what is necessary and scale up when ready.

Event Management

A proven platform for managing events of all sizes. Our system handles end-to-end processes from event creation, registration, ticketing, payments, to post-event analysis. Through our platform of web and mobile applications, we help you manage event operations, organize information flow, facilitate transactions, and provide the best experience for event attendees.

Disaster Risk Reduction Management

A suite of products and solutions that enable an organization's DRRM initiatives, including a Command Center solution that integrates all data from multiple platforms. Able to monitor weather, earthquake, floods, CCTV feeds, and emergency reporting, we provide end-to-end solutions covering systems, hardware, installation, and maintenance.

Property Management

A fully integrated system that enables the facilitation of services between building administrators, property managers, and village associations to its residents and tenants. Designed to automate processes, facilitate payments, and enable communication, our platform helps you increase efficiency, save costs, and improve overall service.

E-Learning

A flexible and user-friendly mobile-first platform for online learning. Capable as a stand alone system with content aligned to DepEd and MELCs or as a platform for loading client's own content, our solution serves as the ideal vehicle to deliver education. With both online and offline functionality, our platform serves the needs of a wide demographic from connected learners to those in remote areas.

Features

GURO Platform is an offline device tool that provides a variety of educational resources to users. Here are some of the features of the GURO platform:

- Offline Access
- Educational Resources
- Mobile Accessibility
- User-Friendly Interface
- Customizable
